Marketing Web Developer

Conversion Rate Optimization (CRO) & Funnel Performance | Marketing-Focused Frontend Development
HubSpot CMS, HubDB & Martech Integration | Digital Experience Strategy & Buyer Journey Alignment

Results-driven, solutions-focused Frontend Developer and Digital Experience Engineer with 15+ years of experience delivering high-performance web solutions designed to optimize conversion, enhance lead quality, and accelerate pipeline growth. Specialized expertise in React, JavaScript, TypeScript, HTML/CSS, and HubSpot CMS with advanced capabilities in conversion rate optimization (CRO), funnel strategy, and data-driven user experience design. Proven ability to analyze user behavior through GA4, Google Tag Manager, and marketing automation platforms to identify drop-off points, align messaging with buyer intent, and implement scalable, high-impact digital experiences that drive measurable business outcomes. Demonstrated success in designing and deploying interactive, conversion-focused web experiences to improve engagement, accelerate MQL-to-SQL progression, and enhance sales effectiveness.

Strategic, data-driven expert in full-funnel digital optimization, using behavioral insights, intent analysis, and messaging alignment to engineer conversion-focused experiences that elevate lead quality and directly support sales pipeline performance. Recognized for building modular, scalable systems, and dynamic content architectures that support real-time updates, personalization, and continuous optimization, while enabling cross-functional alignment across marketing, sales, product, and engineering teams.

Data-Driven Optimization | A.I API Engineering, Scalable UI Systems & Component Architecture | A/B Testing & Experimentation
Lead Capture & Conversion UX Design | CRM Integration | Interactive UI Development & Engagement
API Integration & Dynamic Content | SEO/SEM Collaboration & Web Optimization | Frontend Performance & Optimization
Responsive Design & Accessibility Standards | Cross-Functional Stakeholder Collaboration

PROFESSIONAL EXPERIENCE

OMNI INTERNATIONAL (REVVITY)

Kennesaw, GA | 2016 – Present

Senior Frontend Developer / Web Developer

Drive front-end and digital experience development across product marketing, lead generation, and eCommerce environments, with a mandate that extends well beyond page production into conversion performance, buyer-journey alignment, and revenue impact. Serve as a key bridge between technical execution and commercial outcomes through hands-on development across React, Magento, HubSpot, analytics, and integrated marketing technology ecosystems.

- **Lifted landing page conversion by 31% and improved MQL-to-SQL progression** by diagnosing funnel breakdowns through GA4, HubSpot, and GTM analysis, as well as rebuilding the experience through message match, stronger buyer-stage alignment, progressive forms, segmented CTAs, and sharper workflow logic.
- **Raised lead quality and conversion performance by 21% across trade show and landing page programs** by replacing static forms with a React-based interactive capture experience through guided qualification flows, response-based segmentation, and CRM/CMS data mapping that gave sales a deeper follow-up context.
- **Replaced outdated product documentation workflows with a scalable digital delivery model** by building a centralized HubSpot-powered resource experience through HubDB, HubL, QR-enabled access, and dynamic product-specific content that improved customer access, reduced print dependency, and created visibility into post-purchase engagement.
- **Strengthened digital performance across product marketing and eCommerce experiences** by leading front-end development for a large-scale Magento environment through custom builds that supported conversion paths, product engagement, and more effective user navigation.
- **Expanded interactive marketing capability across the web experience** by developing custom React and TypeScript components through dynamic workflows, product visualization tools, and high-value UI features that improved engagement and supported more immersive digital journeys.
- **Accelerated consistency and development efficiency across the front end** by creating reusable UI structures and scalable component patterns through more standardized build approaches that reduced duplication and improved delivery speed.
- **Elevated user engagement across design-heavy experiences** by translating complex visual concepts into polished, high-performing interfaces through animation-rich builds, interactive SVG workflows, and usability across key digital touchpoints.

- **Improved alignment between experience design and commercial goals** by partnering closely with design, marketing, and product teams through collaborative solutioning that tied visual execution to user intent, campaign objectives, and funnel outcomes.
- **Connected front-end experiences to the broader revenue engine** by integrating web experiences with HubSpot, Salesforce, and analytics platforms through data flow, stronger tracking visibility, and better support for lead management and marketing insight.

DYNAMIX

Kennesaw, GA | 2014 – 2015

Frontend Developer

Supported custom website development across client engagements with responsibility for front-end buildout, responsive execution, interactive functionality, and CMS-enabled content delivery. Worked in close partnership with design and backend teams to produce polished digital experiences across varied business sites.

- **Delivered dynamic, highly interactive web experiences across multiple client projects** by building custom front-end solutions through advanced HTML, CSS, JavaScript, PHP, and LESS development.
- **Improved usability and on-page engagement** by creating interactive UI elements through sliders, geolocation tools, and other custom visual features tailored to project needs.
- **Expanded client control over website maintenance and content updates** by integrating CMS functionality through flexible content structures that reduced developer dependence for routine changes.
- **Raised quality and responsiveness across delivered sites** by partnering with designers and backend developers through tighter execution, cleaner implementation, and stronger alignment between visual intent and technical delivery.

SATORI INTERACTIVE

Alpharetta, GA | 2011 – 2013

Frontend Developer

Contributed across custom client engagements with responsibility for front-end development, application delivery, cloud environment support, and cross-team execution for nationally recognized brands.

- **Advanced delivery across high-profile client accounts, including IHG, Equifax, and Merial**, by serving as lead developer on key engagements through hands-on ownership of front-end execution and project-level technical direction.
- **Expanded digital capability across client platforms** by building custom dashboards, single-page applications, and mobile-friendly web applications through tailored front-end architecture and responsive development.
- **Improved deployment stability and team coordination** by managing AWS Elastic Beanstalk environments and working closely with offshore development resources.
- **Strengthened project quality and client-facing execution** by contributing to UX strategy, client communication, and content development through a more integrated role across delivery and experience planning.
- **Optimized consistency across front-end workstreams** by helping shape development standards and best practices through repeatable methods that improved code quality and project execution.

EDUCATION

Bachelor of Arts – Web Design & Interactive Media, The Art Institutes of Atlanta

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), A.I API's, HTML5, CSS3, SCSS, CSS Modules, SVG, Responsive Design, Tailwind
 UI & Motion: Component Architecture, CSS Animations, GSAP, Framer Motion, SVG Path Animation, Design Systems
 Data & Tooling: Redux Toolkit, REST APIs, Axios, MongoDB, AWS, Vite, Node, GitHub, Figma
